TB11 Custom Custom Trembkr Blk

11103-70-B With medium hot output combined and the warmth of an alnico 2 bar magnet, the Custom Custom humbucker pickup delivers a full, fat sound with singing highs and buttery lows. The Custom Custom humbucker delivers that familiar alnico 2 warmth, along with the rich midrange harmonics of a hotter pickup. The result is a humbucker that sounds full and sweet, and has a warm lower midrange growl that really brings chords to life. The Custom Custom has a fatter treble response than any other pickup, and that gives solos a round, sweet, singing quality. Great for adding fullness and warmth to any humbucker equipped instrument. Pair it with the Jazz model or Pearly Gates model in the neck position for a balanced, versatile setup. Hand built in Santa Barbara, CA, the Custom Custom medium output humbucker pickups use an alnico 2 bar magnet, nickel silver bottom plate, 4-conductor lead wire for multiple wiring options, are vacuum wax potted for squeal-free performance, and are available in either standard humbucker or Trembucker spacing.
