Set, Nazgûl\Sentient Blk

11108-96-B Forged to fathom the deepest of metal tunings, the Nazgûl and Sentient Set’s searing highs, grinding mids and tight bass define modern metal. Take your guitar to the center of the earth with the Nazgûl and Sentient high output passive humbucker pickups. The Nazgûl combines a large ceramic magnet with custom winding specs. The result is a perfect blend of note articulation, saturation, pick attack, and one of the most brutal “chugs” you’ll ever hear from a humbucker. It has incredible harmonic content across all frequency ranges, and an insanely tight bass response. The Nazgûl has a seriously aggressive high gain sound that is lively, yet completely controllable. The Sentient neck delivers a balanced, versatile tone that fits right between the 59 and the Jazz model neck pickups. You’ll get pristine cleans, and fluid leads under high gain. The Sentient is a very articulate vintage output pickup with great dynamic response and a wide harmonic range. It works great for low tunings in all humbucker-equipped guitars. Hand built in our Santa Barbara, CA factory, the Nazgûl and Sentient both feature a large ceramic and alnico 5 bar magnet respectively, nickel silver bottom plate, and 4-conductor lead wire for multiple wiring options. These high output passive humbucker pickups are also available in both 6-string and 7-string passive mount sets, and are vacuum wax potted for squeal-free performance.
