STKT1n Vntg Stack Rhy for Tele

11203-09 Our Vintage Stack Tele pickups offer up unmistakable Telecaster sparkle and spank without the traditional hum. Eliminate that pesky hum while keeping all the chime and bite Telecaster players crave. The Vintage Rhythm Stack is a noiseless Tele neck pickup that delivers classic output and tone. The lows are full and warm, and the treble response has that classic spank. Access to rich chords and bubbly leads is maintained across the fretboard. The Vintage Lead Stack delivers classic lead tone with all of the bright Tele twang, but none of the traditional single coil noise. The highs have a nice sparkle and the low end is snappy and articulate the way it should be. The output is straight up vintage, making this a great choice for players who need to eliminate the hum, but without sacrificing true Tele lead tone. Built by hand in Santa Barbara, CA, this pickup set uses alnico 5 rod magnets, a deep drawn chrome plated cover for the neck, 4-conductor lead wire, and is wax potted for squeal free operation.
