Set STHR1, Hot Rails for Tele

11208-03 Tele-sized dual blade humbucker pickups that will transform your Telecaster into a high output rocker. The Hot Rails for Tele single coil sized humbucker pickups will transform your Telecaster into a fire breathing beast with an unapologetic, mean sound that’s got the power of a set of full-sized high-output humbuckers. The lead pickup features a powerful ceramic magnet, dual steel blades, and over wound coils that combine to provide a raw, heavy tone with amazing sustain. The rich midrange harmonics and tight low end give it a crunch that makes this pickup great for all types of rock and metal. The matching Hot Rails Tele Rhythm pickup fights back with full, warm humbucker tone in a size that drops right into your stock pickup slot. It delivers smooth tone for rhythm playing, and fat single notes for lead work. Hand built in Santa Barbara, CA, the Hot Rails Tele pickups are drop-in replacements for American Standard Fender Telecaster-sized pickup routes. Come with 4-conductor lead wire for multiple wiring options and are wax potted for squeal free operation.
