SP902b Hot P90 Soapbar Blk

11302-10-Bc The Seymour Duncan Hot P90 pickups are designed with dual ceramic bar magnets and are wound for extra power and midrange. Our Hot P90 soapbar pickups combine extra coil windings with two small ceramic bar magnets to give you more output, greater sustain, and more overall sensitivity. Both the neck and bridge models have a pronounced upper midrange that will make chords sound mean and full, and solos sound fat and cutting.When used with the bridge Hot P90, the RWRP, reverse wind reverse polarity, neck pickup will be noise free. Both pickups are drop-in replacements for any traditional Gibson-sized P90 soapbar route.Hand built in Santa Barbara, CA each Hot P90 comes with single-conductor braided hookup cable, and is vacuum wax potted for squeal free operation.
