SP903b Custom P90 Soapbar Blk

11302-12-Bc Our most powerful soapbar model, the Custom P90 high-output pickup delivers a tight low-end punch with edgy top-end grit in the bridge and a mean midrange growl in the neck. With its overwound coil and dual large ceramic magnets, the Custom is our most powerful high-output P90 pickup. In the bridge position, it will give you fat, growling chords that are full of rich midrange and sparkling harmonics. It really emphasizes the attack of your pick against the strings, and can keep even high-gain sounds detailed and defined. Chords are raucous and bold and single notes will jump out with an edgy grit that will have no trouble cutting through any mix. The Custom P90 neck will give you fat, full chords that are nicely balanced and articulate, with the muscular clang that typifies the best P90s. Use two Custom P90s for a high-output setup or pair a Custom bridge model with a Vintage P90 neck for ultimate flexibility. This pickup is a drop-in replacement for any traditional Gibson-sized P90 soapbar rout. Hand built in Santa Barbara, CA, each Custom P90 comes with single-conductor braided hookup cable, and is vacuum wax potted for squeal-free operation.
