SLD1n Lipstick Tube f/ Danolectro

11302-20 Bright, jangly drop-in replacement single coil pickups for Danelectro guitars that deliver that classic Dano chime. Our Lipstick Tube for Danelectro pickups use an alnico 5 bar magnet, and special coil wind to give you the instantly recognizable spank and sparkle that Dano guitars are so well known for. The tone is sharp and jangly and is great for all types of clean tone rhythm playing. Leads have a snarly breakup when overdriven and are full of bright grittiness. The neck model is built RWRP, reverse wind reverse polarity, from the bridge model for noiseless operation when both pickups are used together. The bridge model is made with slightly increased output for easy balancing with the neck pickup.Hand built in Santa Barbara, CA the Lipstick Tube for Danelectro uses an alnico 5 bar magnet, special coil wind, and the classic Lipstick cover with traditional rear-mount bracket. Comes with 2-conductor shielded lead wire, and is vacuum wax potted for squeal free operation.
