PRails w/LP Triple Shot Set, blk

11303-03-B1 Combining a set of our P-Rails and 2 Triple Shots gives you 24 different tones at your fingertips without altering your guitar. In the past, if you wanted humbucker, P90 and Strat tones, you would have needed three different guitars. But now, the P-Rails humbucker delivers all three sounds in a pickup that is a drop-in replacement for any standard sized humbucker. The Triple Shot mounting rings (available flat for super strats or arched for Les Pauls), put 2 switches at your fingertips to easily select your voicing. You dont have to install a mini toggle, nor use push pull pots to access the different tones. The bridge and neck P-Rails can each be split to give you an authentic P90, or it can be split to the Rail coil for Strat like tone. With both coils on, you get a big sounding humbucker that packs a nice full punch. The neck pickup in this set is RWRP (reverse wind, reverse polarity) so you are hum- free when using any single coil in the neck with one in the bridge. Combine them in any combo you want. Available with arched rings to be used on a guitar with a Les Paul-style carved topm or with flat rings for other guitars. Hand built in Santa Barbara, CA, the P-Rails humbuckers use a pair of alnico 5 bar magnets, comes with 4-conductor leadwire for all of the wiring options, and they vacuum wax potted for squeal free operation.
