SMB5D 5Strg for Music Man Ceram

11402-30 Modern replacement for 4 or 5-String Stingray basses, this pickup is punchy and aggressive, like the 90s Ernie Ball Music Man era. Punch, punch, punch. Thats the thing that made 90s Music Man basses legendary, and these pickups faithfully reproduce that tone. With two large ceramic bar magnets and a custom coil wind, this pickup delivers tight, articulate tone along with the solid low end for which Music Man basses are so well known. Heavy rock and thumb-funk players alike love the immediate attack, clarity, and power behind this pickup. Available in 4 or 5-string configurations and are drop-in replacement pickups for 4 and 5-string Music Man Stingray basses. These pickups may fit into OLP instruments as well, but check the dimensions of our pickup (on this site) against the size of your OLPs pickup slot to be sure. Combine with our Music Man replacement preamp for a complete setup. NOTE: not for use with Music Man basses that have a 3-way blade switch. Hand built in Santa Barbara, CA, our ceramic Music Man replacement pickups use two large ceramic bar magnets, Forbon flatwork, 4-conductor leadwire, and are vacuum wax potted for squeal free operation.
