APB2 Lightnin' Rods for PBass

11406-05 Vintage voiced active precision bass pickup with increased output level, and classic exposed pole piece look. The APB-2 Lightning Rods is an active precision Bass pickup voiced for vintage-style tone, but with the benefit of higher active output level. We kept all the familiar vintage P-bass qualities and simply created a vintage-sounding pickup with a hotter output. It has a traditional exposed pole look and is a drop-in replacement for basses with a Fender American Standard P-Bass sized pickup slot. Perfect for the player who wants to keep vintage tone, but needs the consistent, steady signal level of an active pickup. Hand built in Santa Barbara, CA, the Lightning Rods use ceramic magnets, and come with 3-conductor lead wire.
