APJ2 Lightnin' Rods for PJ Bass

11406-06 Vintage voiced active precision jazz bass pickup set with increased output level, and classic exposed pole piece look. The APJ-2 is a matched active precision jazz bass pickup set, built to give you the combination of low end and growl of a vintage set, yet with a hotter output. The familiar low-end swell of the P is paired with the tighter, more concise J to give you a full spectrum of vintage tone. They have a traditional exposed pole look and are a drop-in replacement for basses with an American Fender sized P and J route. Perfect for the player who wants a familiar vintage tone, but needs the consistent, steady signal level of an active pickup. Hand built in Santa Barbara, CA, the Lightning Rods use ceramic magnets, and come with 3-conductor lead wire.
