Pickgrd Assy, Dave Murray, Black

11550-07-B The Dave Murray strat pickguard captures the iconic rhythmic crunch and bubbly lead trills that have influenced guitarists worldwide for decades. Your Strat’s quest for fire is finally over! Fully loaded with Dave Murray’s road tested set up of a JB Jr. flanked by two Hot Rails, this strat pickguard offers a nearly endless array of classic metal and hard rock tones, all without any hum. The Hot Rails bridge delivers a fat crunch with biting harmonics. The JB Jr. in the middle lends punch and clarity in positions 2, 3 and 4. And the Hot Rails neck nails Dave’s signature warm and expressive lead tone. This easy to install loaded strat pickguard will have you runnin’ free in no time. Hand built in Santa Barbara, CA, this fully loaded pickguard comes uses an 11 screw ‘USA’ pickguard pattern. These pickups all use small ceramic magnets, 4-conductor ‘splittable’ lead wire, and are vacuum wax potted for squeal free operation. Available in Pearloid, White, or Black pickguard options.
